Most couples purchase life insurance on each other to provide the surviving partner with financial security.

But if "too much" insurance death benefit is paid to the surviving spouse, some of it could be subject to estate taxes at the surviving spouse's death.

If a married couple dies simultaneously, their estate will include the life insurance death benefits received. As a result, estate taxes may take an enormous bite out of what their heirs will receive.

In both cases, trusts can be used to make the death benefit estate-tax free.

Make sure you aren't "overloading" on spouse-owned life insurance. Talk to me about effective planning techniques.
